P.G. ENTRANCE SYLLABUS - 2026

M.Sc. Artificial Intelligence and Machine Learning and M.Sc. Data

Unit 1: Computing Mathematics

Arithmetic, geometric and harmonic progressions, binomial theorem, permutations and

Multiplication, Transpose, Inverse. Rank of a matrix and other basic operations.

Unit 2: Computer System Organization and Architecture

hexadecimal representations and inter-conversions, Binary Arithmetic-Addition,

arithmetic, floating point representation of numbers, normalized floating point

Computer Architecture: Organization of CPU, Hardwired and Micro-programmed CU,

arithmetic, logic and shift operations. Addressing modes. Memory Management,

set.

Unit 3: Programming with C/C++

Functions, Structures and Unions, Pointers, Files. Object Oriented Paradigm (OOPs),

Destructors, Inline and friend function, dynamic and static binding, virtual class, Virtual

Unit 4: Database Management System

Terminology, Models and Architecture. Relational algebra and Relational DBMS.

Concurrency control techniques, Recovery techniques, Different Types of Files like

Unit 5: Data Structures

Searching Techniques: Quick Sort, Merge Sort, Heap Sort, Bubble sort, Selection sort,

representation in memory, binary tree, traversal techniques of graphs, Concept of

Unit 6: Operating Systems

communications, Concept of Deadlocks, Prevention, Avoidance and Recovery, Memory

Segmentation, Page replacement algorithms, File and I/O Management, Protection and

Unit 7: Data Communications and Computer Networks.

Bandwidth and Channel Capacity. Analog and Digital signals. Transmission media-

Introduction to Computer Networks, Network Classification, Topologies, Networks

Layers: Physical Layer, Data Link Layer Functions and Protocol, Multiple Access

Functions and Protocols, Overview of Application layer protocol.

Introduction, SDLC, Phases of System Development Life cycle. Structured Analysis,

planning and Feasibility Analysis. Project Management ? PERT and CPM. CASE Tools.

and Challenges, Software Engineering Approach; Software Development Process,

Incremental and Iterative Models, Spiral Model, Agile Process Model, Component based

Unit 9: Logical Reasoning

Direction sense tests, Seating arrangement (linear and circular), Puzzles (based on

number series

Unit 10: Sets, Relations and Functions and Calculus

relations and functions, Domain, range, and codomain, Composite functions and inverse

Differentiation, application of derivatives, integration and differential equations

Unit 1: Introduction to Biochemistry

in chemical reactions

interactions, hydrophobic and hydrophilic interactions

? Structural isomerism: Chain, Position and Functional isomerism

? Stereoisomerism: Geometrical and Optical isomerism

relationship between p_H and p_H

Unit 2: Biomolecules

? Amino acids: Structure, classifications and isomerism

? Lipids: Structure, classification and properties

? Key contributions of scientists such as Hans Krebs, G. N. Ramachandran, Melvin

Unit 3: Cell Biology

? Cell Membrane structure & function, Membrane Transport

lysosome.

? Cell cycle and its regulation

? Enzymes: classification and nomenclature

? Enzyme kinetics: Michaelis Menten equation, Lineweaver-Burk plot

? Enzyme regulation: allosteric enzymes

Unit 5: Immunology

? Structure and functions of different classes of immunoglobulins, the genetic basis

? The importance of humoral, cell-mediated and innate immune responses in

? Different types of hypersensitivity, and the importance of conventional vs.

? Principles of tolerance, autoimmunity and the role of immunity in protection

Unit 6: Biophysical and Biochemical Techniques

velocity and sedimentation coefficient

spectroscopy

agarose gel electrophoresis
